Co-operative Education ~ Important Information & Frequently Asked Questions

The student must include an updated resume at the time of the application (hard copy and electronic copy) in order for the application to be processed. Electronic copies should be submitted to the “Coop Applications” folder which can be found in the SRB Handin folder AND should be named by the student’s full name – Ex: “Paul Smith’s Resume.”

Any letters of reference (former employers, supervisors, coaches, etc...) submitted strengthen the student’s application

Coop Teachers will make every effort to place students in their field of choice. However, students who actively pursue setting up their own coop placement prior to the beginning of the actual course increase their chances of maximizing their enjoyment and satisfaction.

What is Co-op?

Co-operative Education is a planned learning experience, for which two credits are earned, that integrates classroom theory (of a related in-school course) and learning experiences at a workplace (the out-of-school placement). Students must attend pre-placement classes before going to work and they must also attend integration classes during the semester to reflect on and analyse their placement experience. The balance of the hours required to earn two credits is through the workplace experience.

When is Co-op offered?

Co-op is scheduled during the morning or the afternoon for either semester one or semester two.

How do I earn credits?

Students earn two credits if they meet the overall Ministry expectations for co-operative education, which involves completing the required pre-placement hours, integration hours and workplace hours, course assignments and satisfactory performance appraisals from their workplace supervisor.

Why should I take Co-op? Co-operative Education allows students to:

- Explore various careers and determine an occupation’s educational and skill requirements.
- Develop interpersonal and employability skills and gain experience for entry into employment.
- Gain enrichment and practice with modern systems, procedures and equipment that are unavailable in high school.
- Experience success, develop self-esteem and earn credits towards a graduation diploma.

How do I get into Co-op?

- Students must complete and submit this Co-op Application Form along with their 2017-2018 Course Selection Verification Sheet. Applications are numbered in order of submission.
- Students who submit a Co-op Application Form will be invited to an interview with a Co-op teacher sometime between March 30th and May 30th.
- Once students have been accepted into the Co-op Program they will be notified.

How do I choose my placement?

The Co-op teachers, in consultation with the student, select the placement and arrange an interview. Students must be interviewed by the placement supervisor to be accepted for the placement. Some interviews occur in the spring (eg. Police, Hospitals, Physiotherapists, Medical Research) but most interviews occur one or two months prior to the scheduled Co-op placement.
